Bugfixes

INFORMATION	
	<p>When opening a project with the new version (2016-17.10), projects of the directly previous version (2016-17.03)</p> <p>are converted and can no longer be opened with the previous version <input type="checkbox"/> Single-User <input checked="" type="checkbox"/> Multi-User</p> <p>are not converted and can still be opened with the previous version <input checked="" type="checkbox"/> Single-User <input type="checkbox"/> Multi-User</p> <p>COM Registration <input checked="" type="checkbox"/> the COM library has been changed and should be registered again (start the program as ADMIN using „E3.series.exe /register“)</p>

The bug fixes are sorted and listed by designer number(s). This enables you, for example, to easily search for bugs reported to our support office.

- Designer-21398** Dialog 'Graphic Information' from Graphic Properties doesn't display all existing objects
- Designer-23153** Impossible to place several groups one after the other using the COM method 'Group.PlaceInteractively'
- Designer-25831** Dialog Segment Diameter can't be displayed in E3.view.
- Designer-28544** No undone of full variant/option-name-display although clarity is given
- Designer-28791** E3.ReportScripts: Incorrect signal in the connection list containing signals of a signal class because of wrong signal name returned by COM calls 'Con.GetSignalName' and 'Con.GetTranslatedSignalName'
- Designer-28799** E3.ReportScripts: BOM: No output of configurable connector inserts with assigned connector device names
- Designer-28842** After change of the device properties from a shield with single wires, the folder <wires> is not displayed anymore
- Designer-28844** Symbols with polygons which are placed as graphic and then mirrored or rotated are shown a second time in original direction if opening the context menu of a pure graphic object
- Designer-28846** A terminal jumper can be connected to a pin without assigned attribute 'terminal jumper'
- Designer-28859** Changing the assembly properties may lead to a program crash
- Designer-28867** Text types #1067 ("Date of modification (sheet)"), #1068 ("Time of modification (sheet)") and #1069 ("User name of modifier (sheet)")

	are changed in entire project when adding a new sheet
Designer-28876	E3.RevisionManagement: The 'E3.CompareConfiguration.ini' returns incorrect data behavior when using Japanese characters
Designer-28878	E3.RevisionManagement: Configurable connectors are not supported (output doesn't contain any Port information)
Designer-28913	When attribute lines of attributes which exist several times are transferred to other objects by using CTRL+C and CTRL+V, the message "The attribute [xyz] ([xxx] is unknown" appears
Designer-28923	"W - Cannot connect two user-defined signals !" during Autorouting in schematic 'After move'
Designer-28930	Big sheets are scaled at PDF export (although bigger sheets are allowed at PDF default 1.6)
Designer-28940	Incorrect PDF output of mat sealed connectors (filling is missing)
Designer-28942	Sheet line and sheet column are listed in the sheet properties within project
Designer-28952	Incorrect view of mat sealed connectors in Multiuser
Designer-28973	When moving connectors on a Formboard sheet, connection lines are not moved and deleted => no function of "AutoRouting" in Formboard
Designer-28976	When a connection is made between two views, other views which own a connection in original don't display any conductor logic lines
Designer-28983	E3.ReportScripts: Connector pin terminals of inserts in configurable connectors are listed twice in the bill of material
Designer-28984	The COM functions 'Sht.GetGraphIds' and 'Sht.GetGraphCount' return inactive graphic objects although only active objects shall be considered
Designer-28986	Search in project for Device Designation returns pin views only for connector pins
Designer-28997	The dialog 'Assign variants/options' displays incorrect or not all options which are assigned
Designer-29017	The project setting "Display STEP models in 3D" can't be saved as "active" in the template file
Designer-29021	The COM function 'Dev.GetMountTypes' doesn't return any values for connectors
Designer-29032	Performance problems when working with panel
Designer-29040	Sheet references with prefixes allow jump to schematic only on parts of the reference text
Designer-29044	The text type 'Reference to panel / Reference to schematic' is displayed only partially after "Renumber" of sheets
Designer-29065	Export as Image with high resolution (400 dpi) lead to E - null image!!! E - Export of image failed!
Designer-29070	When in the database editor a component is given as template for block, assembly, hose/tube or connector pin terminal group which doesn't exist in the database, an incomplete message appears
Designer-29074	When connecting a wire to a connection without signal, the signal name display on the pin text changes from signal on pin to the signal of conductor
Designer-29077	E3.CopyDatabaseEntries: Error when import model with COM call 'CT.DBTools'
Designer-29086	No display of pad forms in the component view of 2016 within the

database editor

- Designer-29087** Project window is missing after saving project with a script which is started in the task scheduler
- Designer-29099** Incorrect connector naming on blocks in specific combinations
- Designer-29100** Incorrect connector device designation on hierarchical blocks
- Designer-29113** No ability to place a model on a matching slot in a variant position, when on this slot already something has been placed in another variant but no variant position is existing in the current variant
- Designer-29119** The COM functions 'Pin.GetMaterialDescription' and 'Pin.GetMaterial' do not return any value at inactive objects
- Designer-29124** No function of parameter "Resultfile=ChangedOnly" at project comparison
- Designer-29127** Cable ducts/mounting rails can't be docked to other cable ducts/mounting rails when extending
- Designer-29139** Attribute text template symbols are not subject to the same rules as other symbols at AutoRouting within schematic
- Designer-29148** No ability to jump via text type 'Reference to schematic' (#1141).
- Designer-29167** Error in Function int __cdecl md_move_termplan_cells (struct MODIFY_HANDLE *), ret = 2' when moving a text of a terminal plan row symbol
- Designer-29215** Renaming devices in the device tree not possible if change is only upper/lowercase and the name contains a dot
- Designer-29228** When connections with many variants and instances are created in a project an infinite loop occurs
- Designer-29230** An incorrect value appears at the content display of the database field "Supplier" in a text node on a symbol
- Designer-29306** Product mark is displayed incompletely
