Bugfixes

<table>
<tr><td colspan="2" style="background:red;color:white">INFORMATION</td></tr>
<tr>
<td>ℹ</td>
<td>

When opening a project with the new version (2019-20.10), projects of the directly previous version (2019-20.04)

are converted and can no longer be opened with the previous version
      [   ] Single-User
      [   ] Multi-User

are not converted and can still be opened with the previous version
      [x] Single-User
      [x] Multi-User

COM Registration
[x] the COM library has been changed and should be registered again
     (start the program as ADMIN using „E3.series.exe /register")

</td>
</tr>
</table>

The bug fixes are sorted and listed by designer number(s). This enables you, for example, to easily search for bugs reported to our support office.

Designer-34170	Massive performance problem when inserting a cut circuit
Designer-34332	Assignment of different variants/options to pins of the same connector within a pin group is not possible
Designer-34339	Change of the active composite is only accepted for existing connector when the original is placed
Designer-34399	E3.DBTool can't be started - Message 'The program can't start because E3_globallib.dll is missing'
Designer-34413	Conductor is multiply displayed as connected in net
Designer-34558	Sub-circuit can't be created via the structure node context menu "Export Drawing"
Designer-34596	Incorrect or unclear messages when connecting to "bus lines"
Designer-34636	Restoring the visibility returns the warning 'W - Error when reading the XML-file '........xml' The keyref-element 'ID2031' is not used as key for the identity restriction 'id-unique' .'
Designer-34656	E3.RevisionManagement: 'E3_customid.dll' does not work as expected at free comparison
Designer-34710	Wire properties are not always displayed
Designer-34733	A block connector of a hierarchical block can't be assigned as variant instance
Designer-34736	Auto renaming of mating parts doesn't work when connecting to terminals
Designer-34740	Preview of a DB sub-circuit generates 'E - KONSISTENZ-FEHLER:

	get_attnam(): inv source (xxx)'
Designer-34748	PDF Export: The setting "Export Version" is reset when opening the dialog again
Designer-34755	The entry IsEncrypted in the registry under HKEY_CURRENT_USER\Software\Zuken\E3.series\xx.0\ValidDatabases is not created in certain circumstances
Designer-34764	Hyperlinks to shared sheets do not work in exported PDF
Designer-34779	Attributes are inherited to devices although they are assigned to pins
Designer-34793	Item validation prevents adding and changing of structuring attributes
Designer-34799	Performance problem with removing blocks with many connectors
Designer-34802	When cutting and afterwards pasting circuits, wires are unconnected
Designer-34803	The edit process for connectors with many pins takes very long (opening in DBE)
Designer-34836	Moving a net node in Formboard takes very long
Designer-34884	Views of component pins are displayed twice in tree
Designer-34895	When text type 34 is missing in sheet, errors are only updated after jerking (reduction)
Designer-34899	Item validation prevents import of sub-circuit into empty project
Designer-34904	Older E3 projects can't be opened anymore
Designer-34924	Incorrectly path definition after installation in the registry for sub-circuits of the delivery database
Designer-34970	Error message: "Error in function hntermplan\collect_direct_connection(), ret = 5" when creating a terminal plan
